

Magic Carpet

By Alex Ratner ©2001

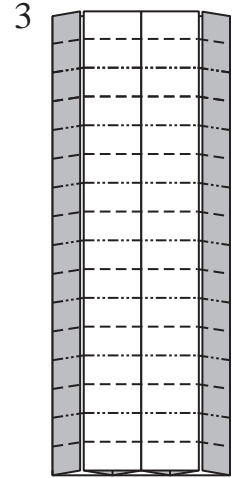

Overworked geniuses will really appreciate this model as it takes much less work to fold than most magic carpets.

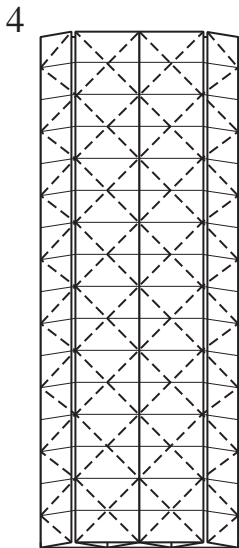

Make a 16X16 grid of creases by folding the paper in half, in fourths, eighths and, finally, sixteenths both ways.

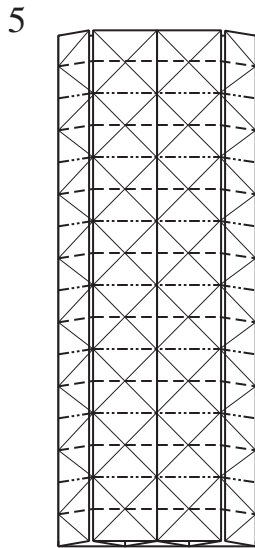

Make the indicated vertical mountain and valley creases.

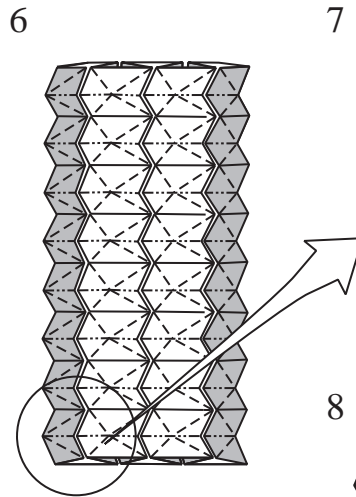

Make the indicated horizontal mountain and valley creases.

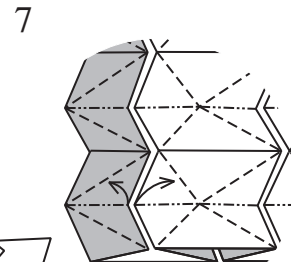

Make diagonally valley creases.

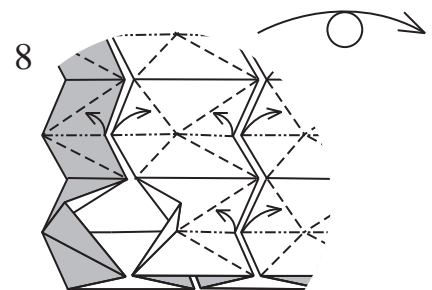

Pleat the the model horizontally and open partially.

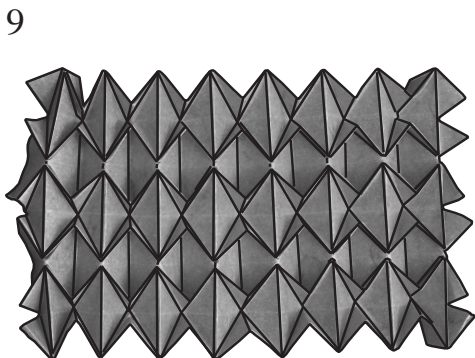

Close up of the corner.

Reverse-fold on the front layer

Repeat the reverse folds 24 times. **Turn over.**

The ideal companion to your car, the Magic Carpet is complete.
